

ENVIRONMENT AGENCY

East Chisenbury river enhancement scheme Phase - I

Key Techniques:

Coirnet bank revetment

'BEFORE' - March 2005 - Showing over-widened, dredged channel

'AFTER' - May 2010 - Five years later showing 'favourable condition'

Sinuous flood berm with bio-diverse riparian zone

Riparian pond

Brushwood sediment trap

Spawning riffle - seen here during low flows

Composite Coirnet berm with LWD
